PROFILE

Hi!,
My name is Tomasz, I am tech lover, Full Stack Developer currently working as a Front End Developer in React & TypeScript projects 😊

EXPERIENCE

React TypeScript Developer

Orange LAB Polska |
From 10/2022 – present

Working on two projects, first one TV streaming platform, where I am responsible for front end development, using React JS and TypeScript. Second one as front-end owner of internal CMS project. I am also responsible for creating and maintaining unit & E2E tests for front end code.

Scrum Master & Full Stack Developer

MegaK Bootcamp Project |
From 07/2022 - 08/2022

Two months group project, where I had a chance to test myself as a scrum master for the team of 6 developers, also as a full stack developer on learned technologies, learning in the meantime missing pieces. Quite an adventure 😊

Junior Full Stack Developer

Dare Drop |
From 05/2022 - 06/2022

This was first opportunity to work in IT global environment for US client and remotly with part of the team from US and part from Poland. Amazing chance to see how start ups works and how dynamicly it grows.

Senior General Ledger Analyst

Marsh McLennan |
From 2020 - 06/2022

Work on financial data analysis and cooperation with global stakeholders for problem solving

Senior General Ledger Analyst

Accenture |
From 2018 to 2020

Cooperation with European Financial Controllers to deliver high performance financial services

Credit Management Analyst

Tate&Lyle |
From 2015 to 2017

Work on US Market with 3rd party clients financial data, analysis of credit ratios for limits setup.

University of Lodz

2009-2012

TECH STACK ICON

HTML · CSS · Tailwind · MUI · StyledComp · JavaScript

TypeScript · React · RQ · NextJS · GraphQL · Redux

NodeJS · Express · NestJS · TypeORM · MongoDB · MySQL

TDD · RTL · Cypress · GIT · CI/CD · Docker

PROJECTS

Orange TV GO 📺

Project OTG is a multiplatform TV Streaming service including Web Application, Android Mobile, IOS and Android TV. The application use one common backend and sync between each other. The application is created to connect users with their favorite TV shows and movies.

This project was a great opportunity to build as much scalable and long term adjustable to business needs application as possible in great team of experienced developers, UX designers and testers across different platforms and with usage of current best practices and new tech stack.

Independent E2E Automation project ✏️

Independent E2E Automation Project was a project which was build from the ground on separated repository for team of 2 automation testers and one developer for code review and guidance. The goal was to automate as much manual tests as possible with as much as possible scalability and maintainability also avoiding fragile tests and flaky tests.

The project was a great success and it was best possible learning experience for me and my team. We learned a lot about E2E Automation and how to avoid flaky tests and how to make tests more maintainable and scalable. We also learned a lot about Cypress and how to use it to its full potential using CI/CD, Docker and automate as much as possible.

Batman Multiplatform CMS 🦇

Batman CMS Project is a multiplatform Content Management System to manage TV content on multiplatform TV Streaming service including Web Application, Android Mobile, IOS and Android TV. The application use two backends in GO language, one for TV platforms and one for managing content and sync between each other.

This project was build from the ground up using the latest technologies and best practices. The project is long term and will be growing in the future.

MegaK Head Hunter 🧑‍💼

Project Head Hunter is a final bonus stage of 1 year Full Stack JS Bootcamp. The application brings together all knowledge and technologies which we were learning throughout this time. Application is created to connect software developer students with recruiters through admin supervision.

The project was a great opportunity to learn how to manage a team of developers and how to work in a team. I was responsible for frontend as well as backend and choosing tech stack as tech lead of the project. It was a pleasure and great boost for my productivity and knowledge.

Dare Drop 🎯

Dare Drop is a platform where creators complete dares to reward their fans, fostering a community of gamers who enjoy challenges. The company produces software that aids games in building their player base through challenges, helping influencers grow.

This was first opportunity to work in IT global environment for US client and remotly with part of the team from US and part from Poland. Amazing chance to see how start-ups works and how dynamicly it grows.

IT & PROGRAMMING EDUCATION
