

Tomasz Stanisław

Software Engineer & Tech Lead

I turn ideas into solutions — shaping the *concept, design and architecture* — then ship across the full stack and *grow the people* who build it with me.

01 Experience

Tech Lead · TheEventa

Event-booking platform · MVP v1 under development

Concurrent role September 2025 - Present

Next.js app

Wizard forms, pricing

NestJS API

Auth / SSO, orgs, assets

Admin panel

Events, spaces, orgs

Design system + Storybook

Playwright E2E across every surface

- Turn product ideas into solution designs and architecture, then lead development across the Next.js frontend, NestJS backend, internal admin panel and Playwright E2E project.
- Lead workflows for authentication/SSO, event objects and spaces, organizations, assets, wizard forms and pricing recalculated from selected options.
- Own the frontend design system and Storybook, alongside the landing page and blog.
- Review code, feature implementations and manual and automated tests, using agent-assisted workflows with personal oversight.

Software Engineering & Technical Leadership · Orange Polska

October 2022 - Present

Formal title: Inżynier DevOps

- **Architecture:** design and develop the React and TypeScript frontend of an internal CMS, with navigation, actions, forms and data grids driven by backend configuration and JSON schemas, bringing together resources from multiple connected legacy services.
- **Forms at scale:** schema-defined forms with RJSF custom fields and widgets, using Material UI and MUI X Data Grid Pro.
- **Delivery:** a new CMS version released every two-week sprint since 2022.
- **Leadership:** technical guidance and code review for three CMS developers.
- **Quality:** established a Cypress E2E project from scratch with Page Object Model, DRY shared test logic and parallel execution; trained two junior testers and reviewed their code during its first year.
- **Product:** built a streaming-platform feedback form and backend submission flow that makes user opinions and ratings available to the Product Owner.

Junior Full Stack Developer · DareDrop

May-June 2022

US startup

Before engineering · Finance & accounting

Earlier career

Financial reporting, reconciliations and month-end processes at Accenture, Marsh McLennan, AkzoNobel and Tate & Lyle — practical domain context for financial and business software.

02 Stack

WEB & MOBILE

React TypeScript Next.js JavaScript
React Native

BACKEND

NestJS Go (contributions) Python (as needed)

UI ARCHITECTURE

RJSF Material UI MUI X Data Grid Pro
Storybook Design systems

QUALITY

Playwright Cypress Page Object Model
Parallel E2E Code review

03 Credentials

Associate Cloud Engineer — Google

Issued July 2024 · Expires July 2027

English — approximately C1

Used professionally in international environments

Master's, Finance and Accounting

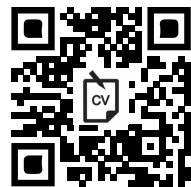

University of Lodz · 2012-2014

Bachelor's, Finance and Accounting

University of Lodz · 2009-2012

COMMUNITY LEADERSHIP

I lead ATOM (Akademia Tworzenia Oprogramowania), a programming community with 900 members.
